Summary

I am currently a student at La Trobe University, studying the Master of Information Technology. I am seeking an opportunity to apply my skills to develop new products, while enhancing my professional and personal skills. I am familiar with Object-Oriented concepts and I have hands-on experience with languages including Java, Python and JavaScript. I am particularly interested in Mobile and Web Application Development and I am familiar with the React Native Framework and Flutter at junior level. I possess a growth mindset and I am a team player, but also feel comfortable working independently.

Core Skills

- Mobile Application Development, Web Development
- Java, Python, Swift, HTML, JavaScript
- React / React Native
- Redux
- NodeJs
- Xcode, Visual Studio Code
- Flutter

Education

La Trobe University - Melbourne 2020 - 2021
Master of Information Technology – Current **WAM: 84.75**

La Trobe University - Melbourne 2017 - 2019
Bachelor of Computer Science – **WAM: 83.16**

Hanoi University of Science and Technology - Hanoi 2015 - 2017
Bachelor of Information Technology

Technology Projects

https://github.com/pxviet1997/MAD-Restaurant-Order-App.git
An app used in restaurant for customer to order meals and checkout. Work with 2 other members as a project for a subject (CSE3MAD). Tasks I have done include:

- Planning on which approachs should be considered on making the app
- Design UI and styling, including the main menu, meal menu and meal status menu
- Implement behavior of the application, such as transition between menu windows, button-click event and what happen when order is placed

(over next page)

- Research on how to use fragment in Android Studio
- Research on using Git in Android Studio

https://github.com/leductrong975/sa-react-web-application.git

A website to give users and the general public a platform to raise awareness on the social issues prevalent in the world in order to bring about the all-important change in the world and give the society means to be aware of the social issues and tackle them. Technology that was used in the project:

- React
- Firebase Authentication
- Firebase Realtime Database
- Firebase Hosting

In this project, I was in charge of helping in creating the Sign In – Sign Out page, host the website on Firebase Hosting and rewrite code for more efficiency.
